DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to an array of disposable garment configurations, classified in class 604, subclass 385.1.
 - II. Claims 9-24, drawn to a merchandise display system, classified in class 40, subclass unknown.
 - III. Claims 25-33, drawn to a device for identifying an absorbent article , classified in class 40 , subclass unknown.
 - IV. Claims 34-36, drawn to a method of marketing disposable absorbent articles to consumers, classified in class 40 , subclass unknown.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because you do not need the indicia of Group II and IV to use the absorbent article nor do you need the movable component of group III and its device for identifying to use the article

Art Unit: 3765

for the absorbent article to be functional. Additionally, the method of the items does not need the placing or displaying of the plurality of absorbent articles in sequential order for the article to be functional. Equally true is that you do not need a removable component in the device for identifying in group III for displaying the article. Also, a different method of marketing can be used and the item remains in demand. The subcombinations or combinations have separate utility as shown above.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-IV, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Attorney Jay Krebs on March 8, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
